

AHMAD UMAER BIN MOHAMAD

NO.64, JALAN P9B1/4,

PRESINT 9, 62250

PUTRAJAYA

JUNE 2022

To Management/Human Resource,

I am writing this letter in order to apply for **Software Engineering** position or any other position that is related Software Development or Web Application Development. I have 2 years of experience developing applications for the Machine Vision and Automation and involved in database project for Warehouse Management System using MySQL. I'm looking forward to improve my knowledge in Software field and to apply the new knowledge in the present and future.

Firstly, my qualification is Bachelor of Engineering (Honors) Electrical. I gained some programming knowledge in my studies and continue to do self-study on much more programming language after my graduation. My current focus is on **Data Science, Deep Learning** and also **Web Based Application**. With my current knowledge I can provide support in wide area of studies. You can view the programming language I experienced in my resume.

I will do my best to give contribute and adapt to your environment. My goal is always to improve myself and give the best to your company. For any inquiry you can contact me with the contact information I provided below.
